

# Mining

The Mining industry has long been one of the most demanding sectors for special bolts & fasteners.

Latterly, similar products have been provided to Underground Tunnelling projects for both new construction & maintenance.

# From standard & special products like **anchor bolts**; **spear bolts**; **holding down studs**; sockets to **bespoke manufacture for specified designs**.

The flexibility offered by **CLYDE FASTENERS** is a distinct advantage in meeting **critical contract timelines**. Our ability in developing prototypes can also truly add value in new product development.

Finishes range from hot dip galvanizing and sherardized and include bright zinc plating plus other specialist finishes – most of which are carried out in-house **CLYDE FASTENERS**.

## Mining & tunneling finishes:

- Self Colour
- Zinc Plated
- Galvanised
- Sheraplex
- Rilsan Coated
- Delta Tone
- Zinc & Olive Drab
- Aluminsed

## Testing capabilities

- Tensile & Wedge Testing
- Proof Load Testing
- Charpy Impact Testing
- Impact Load
- Rockwell & Brinell Hardness Testing
- Thread System 22
- Ultrasonic Inspection
- M.P.I Crack Detection
- P.M.I
- Microstructure Examinations
